

Dermacase

Tom Enta, MD, FRCPC Stewart P. Adams, MD, FRCPC

CAN YOU IDENTIFY THIS CONDITION?

A 30-year-old woman had an asymptomatic non-scaly papular eruption on her left elbow. The lesion consisted of slightly red papules forming an annular plaque.

The most likely diagnosis is:

1. Tinea corporis
2. Granuloma annulare
3. Sarcoidosis
4. Lichen planus
