

Can you identify this condition?

Danielle Gordon Benjamin Barankin MD FRCPC

A 26-year-old female patient presents with multiple skin-coloured, smooth, firm papules on both the right and left lower eyelids. She has noticed that her mother has similar bumps on her eyelids.

The most likely diagnosis is

1. Syringoma
2. Xanthelasma
3. Trichoepithelioma
4. Sarcoidosis
5. Sebaceous hyperplasia
