

(the document is massive, but the executive summary is worth a read). I believe that the Ornish et al⁹ study is the first human study that shows coronary artery plaques can be reversed, and a plant-based diet is a cornerstone of this clinical trial. It is time that nutrition, health, and issues such as the environment are considered in concert.

In the future, I hope that *CFP* will take such factors into consideration regarding industry-sponsored publications and nutritional information. I hope that an equal emphasis will be given to the many studies from reputable journals that discuss the benefits of plant-based diets.

—T. Mehta MD CCFP
Brampton, Ont
