

D: Roundtable Participant Pre-Meeting Survey

Below are survey questions asked to participants in advance of the Roundtable, with summary results in graphical format. Brief biographies and optional contact e-mails were also collected to circulate to participants in advance of the meeting and to help facilitate contact afterwards.

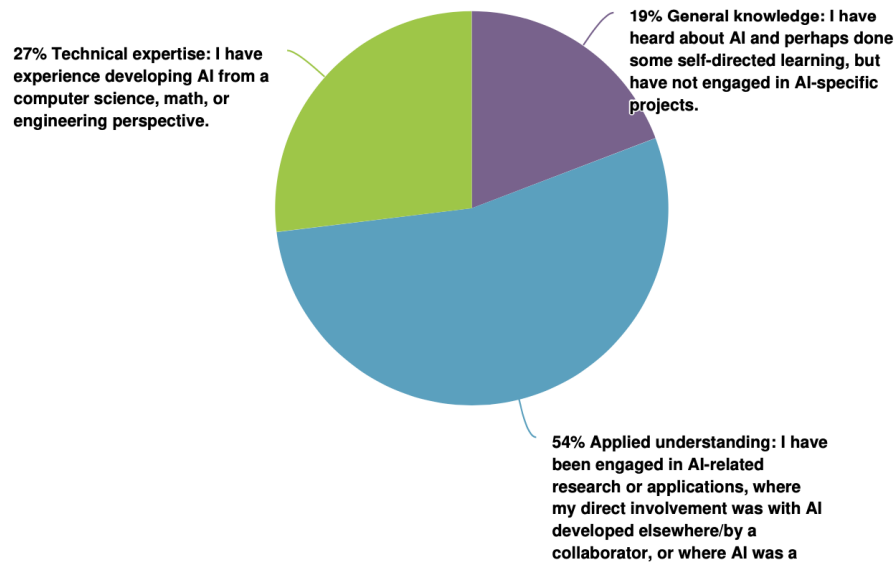

Q1. How would you describe your familiarity with family medicine and the nature of work that goes on in primary care? Please select the highest relevant category.

n=26 responses

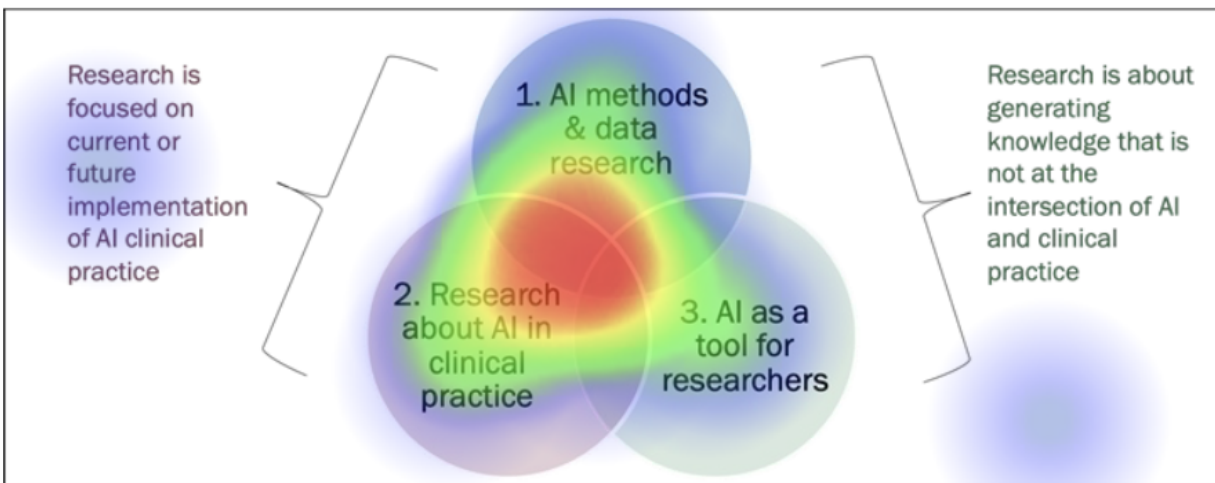

Q2. What is your familiarity with artificial intelligence? Please select the highest relevant category.

n=26 responses

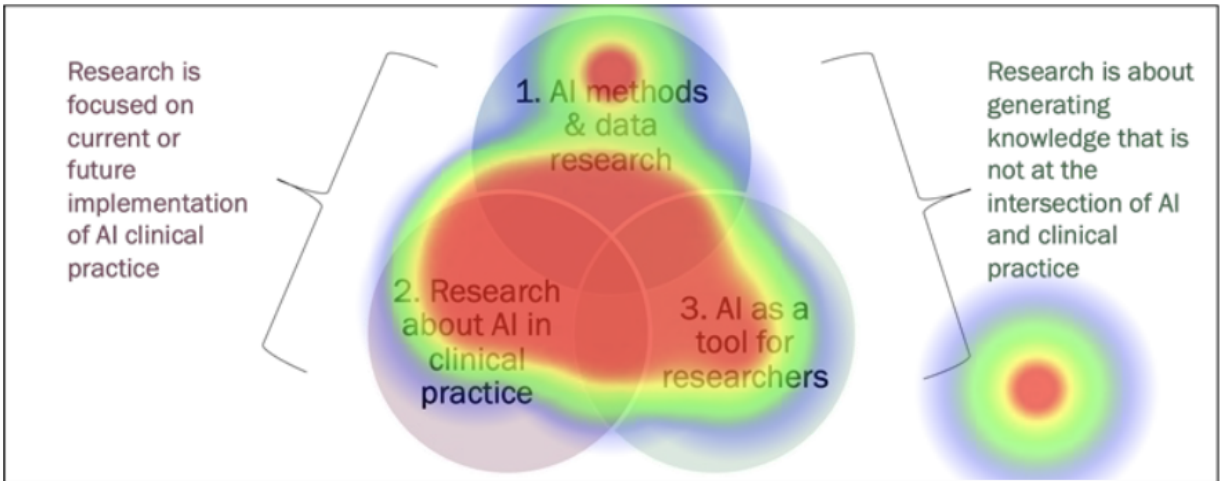

Q3. Please click within the intersecting circles in the place that best represents where you would situate your own work to date in AI for health research or related initiatives.

n=23 responses

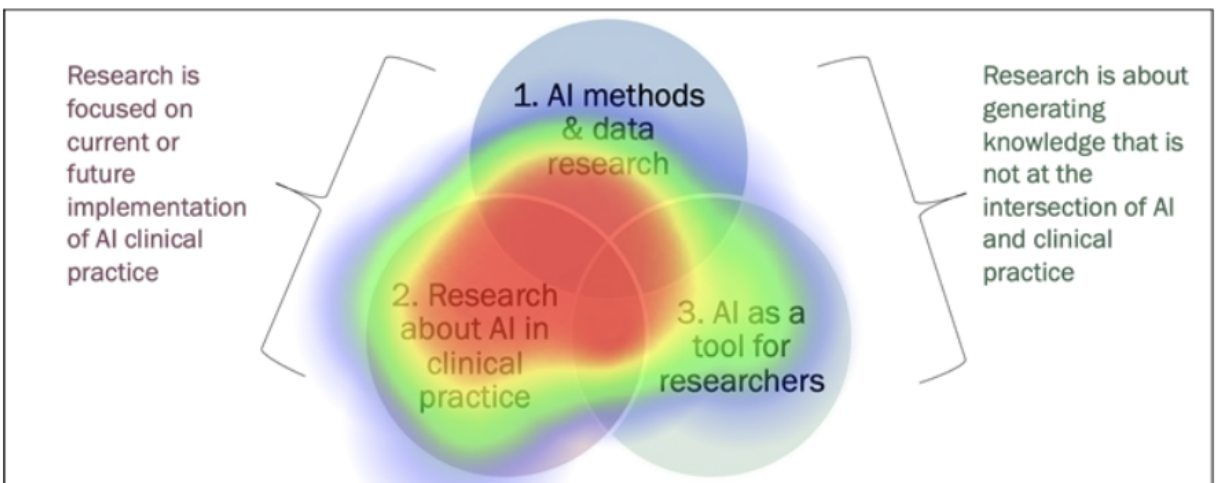

Q4. Please place a dot within the intersecting circles in the place that best represents where you would situate your own work to date in AI for family medicine-specific research or related initiatives. If you do not have family medicine-specific experience, please leave this blank.

n=19 responses

Q5. Please place a dot within the intersecting circles that best represents your area of strongest interest in AI for family medicine- specific research. Your interest and experience might be the same.

n=24 responses

Q6. What is one thing you hope to get out of our full day roundtable meeting with other AI and family medicine leaders?

[free text responses; not shared publicly]

Q7. How do you think AI for family medicine will move forward?

[free text responses; not shared publicly]
